The Active segment collects all the garments studied for the walked up hunting, both for hare or wing Upland hunting and for stalking in Big Game. The Active Hunt sets protect your walks in the wood or in the fields. Many little details characterize jackets, vests and pants, to provide easy access to pockets, and to make cartridges holders and game bags highly comfortable for every user. The Active line offers versatile and modular garments suitable for different climate situations, from mild to intense cold, thanks to the BIS - Beretta Interactive System. Active stands out for elasticity and breathability thanks to specifically studied design based on hunters movements. The main technical features of Active segment sets are: water repellent and/or waterproofness, fabric’s breathability lightness in term of weight rip resistance silence

Bis Vest Detachable Hood Bolero
GU6110653
MSRP 325.00

Style Description
Bis detachable convertible hooded bolero jacket with Polartec Alpha® thermal insulation and Polartec Power Stretch® inserts in the key areas.

Polartec® Alpha® is the latest evolution of synthetic insulation offering a rare combination of lightweight warmth and true breathability in a “puffy” style garment. Because Polartec® Alpha® insulation is highly durable and more stable than other synthetic insulation products, more open-structure woven face and back fabric can be used to create a super-permeable package. This small amount of airflow rapidly draws moisture away from the body and allows Polartec® Alpha® to be worn in a wider range of activities compared to classic “puffer” style insulation.

Details
- Detachable nylon hooded bolero
- Removable zip pocket
- Stretch insert on the side.
- 400S zip on the cuff
- Comfortable fabric thumbhole.
- Stretch binding bolero hem.
- Loop for Bis-Beretta Interactive System on the cuff and on the back collar.
- Internal elastic vest’s armhole.

Active Fleece

Performance Hooded Fleece Jacket
P31310656
MSRP 225.00

Style Description
Hunting fleece jacket in Polartec® Power Grid® stretch.

Details
- Polartec® Power Grid® fabric are designed to keep your skin dry when you sweat. All fabrics in this series feature a bicomponent knit construction that uses different yarns on either side of the fabric. This creates two different surfaces: one that is optimized to move moisture away from the skin, the other to dry quickly. Superior moisture management plus our patented Power Grid® construction ensures that athletes get the most bang for their fabric buck. These fabrics weigh less, take up less pack space, and deliver more insulation and breathability than most fabrics in their class.

Line / Family
Active Fleece

Line / Family Description
Different weight and different technology for our fleece line developed to give maximum comfort at the hunters and to protect them from the elements.
Static Fleece Jacket

### Style Description
Binocular Fleece in Polartec® Thermal Pro® Classic 200.

Polartec® Thermal Pro® fabrics are the most visually dynamic and technically advanced of the Polartec® Insulation Fabrics. Available in a variety of unique surface textures and patterns, many of which enhance performance. Polartec® Thermal Pro® fabrics are great styling options for virtually every end use. New high loft versions have achieved the highest warmth to weight ratios of any fabric Polartec® has ever offered. Other versions have the look and performance benefits of fleece. Polartec® Thermal Pro® is our most diverse family of fabrics.

Line / Family Description
The Active Segment collects all the garments studied for the walk up hunting, both for hare or wing skid hunting and for stalking in big game. The Active Hunt sets protect you during walking inside the wood or in the field. The details that characterize jackets, vests and pants are studied for easy access to the pockets, cartridge holder and game bag giving maximum comfort at the users. The Active line offers versatile garments for different climatic situations from the mild to the intense cold thanks to the KIS - Beretta Interactive System jacket, vest and pants that make garments for mild climate perfect also in cold situations. The main technical features of the Active hunting sets are: water-repellent and/or waterproof, fabric’s breathability, lightness in term of weight, rip resistance, silence.
